# THE USA is prepared for the legalization of the reckless net games

17.01.2002 06:25

To iTshare

While net games of chance did receive sufficiently wide acceptance in Europe, in THE USA for this market only one must be formed, since in the very near future are expected the general/universal legalization of net games of chance into SShA. Fabritsio Of bokkardi (Fabrizio Of bochchardi), businessman from Las-Vegasa?one of many owners, who awaits this legalization. He reports that on his order was already developed the portable device/equipment, which will make it possible to count on anything and whence it is convenient. Thus far technical details are not proclaimed, and as reports the newspaper Of shall it streyet Zhournal, the mass use of this invention will begin not earlier than through two goda. Poka it is not known, when legislative measures for the legalization of the games of chance are accepted, however, judging by the growing attention of owners to this branch, and, correspondingly, to pressure on the government, it is possible with the confidence to say that sooner or later this proizoydet.
